Performance Overview

East African Breweries Limited (EABL) recorded 15% growth in revenue to Kshs 86.0 billion for the year ended June 2021. Profit before tax was up 2% to Ksh 10.9 billion. The slower profit growth rate was driven by the impact of cost inflation, adverse foreign exchange impact and tax charges.

Operating Environment

EABL's performance was delivered on the back of a tough operating environment. Through fiscal 2021, the pandemic continued to impact the business negatively across East Africa due to the restrictions in Kenya and Uganda and the general decline in disposable incomes in the region. The company responded to the new realities by continuing to invest behind the brands (leveraging changing consumer behaviour and channel shifts), expanding capacity and sustaining productivity initiatives to manage cost base to ensure we emerge stronger.

Future Outlook

We are cognisant of the fact that the uncertainty posed by the pandemic will continue. However, we are confident that our strategy is working and will continue to focus on business recovery to grow top line and recover margin.

Financial Highlights

- EABL's volumes grew 13% to 14 million EUs.

- Group revenues up 15% to Kshs 86.0 billion, driven by smart investment behind brands, channel focus and innovations.
- Profit after tax for the period declined 1% to reach Kshs 7 billion.
- Net cash from operating activities up 337% to Ksh 14.6 billion, driven by tight management of working capital and productivity initiatives.
- Capital investment of Ksh 7.8 billion, investing ahead to support growth.

Dividend

In recognition of the continued uncertainty in the external environment due to Covid-19 related restrictions, the Directors do not recommend a final dividend.

By order of the Board

Kathryne Maundu
Group Company Secretary
